

POLICY ON ANONYMOUS REPORTING

I understand and acknowledge The Wright Center is a non-profit, publically funded, community asset, and that all employed residents, physicians and staff commit to be mindful and active patient and educational advocates at all times.

I understand that the mission, vision and core values of The Wright Center as my employer empower me to be brave and speak up in instances where patient quality or safety may ever be compromised, where the dynamic of the learning environment becomes unhealthy or in situations where any moral or ethical principles of our medical profession are ever in question.

I understand it is my responsibility to The Wright Center, my fellow residents and physicians, all team members, and most of all, to my patients, to bring attention to any instances that undermine patient care, quality or safety, as well as the core values or mission of The Wright Center, whether the incident occurs within a Wright Center venue or within an affiliated learning environment.

As patient-centered eyes and ears in the clinical learning environments, all Wright Center residents, physicians and staff must contribute to learner-driven improvements in all affiliated educational venues and forums to promote quality and safety of patient care and medical education.

I understand I play a vital part in anonymous reporting and will report swiftly and as frequently as possible when I see a need for improvement in patient care or medical education.
